# NSI
## NEAL SYSTEMS INCORPORATED

**Your one source for Instrumentation, Analyzers, Automation, and Tank Hardware**

We help you protect assets, improve efficiency, enhance control accuracy, and meet regulatory requirements

## Field Devices

Pressure, Flow, Mass Flow, Level, Temperature

## Vibration / Machinery Protection

Machinery Monitoring Systems, Diagnostic Systems, Accelerometers, Proximity Sensors, and Switches

## Gas Leak and Analyzers

Toxic, LEL, Oxygen, Visual Flame, UV/IR Flame, Flare, Gas Analyzers

## Wireless / Telemetry

Accutech Field Instruments, Cellular, Narrowband, Licensed/Unlicensed, Ethernet

## SCADA and Remote Terminal Units

SCADA Systems, SCADAPacks, Dataloggers

## Storage Tank Hardware

Heaters, Pressure Relief, Tank Gauging, Temperature Switches, Flame Arrestors

## The NSI Solution

**Protect Assets**
Enhance gas leak, flame, and fire detection for your personnel and plant assets.

**Improve Efficiency**
Measure vibration, temperature and pressure to improve pump / compressor efficiencies.

**Enhance Control Accuracy**
Improve accuracies and speed in gas / liquid analysis, pressure, temperature, and flow.

**Meet Regulatory Requirements**
Meet EPA, DEP and cyber regulations for various measurements and data storage reporting solutions.

# Service and Engineering Capabilities

### Calibrations
Certificates are stored securely and emailed as a PDF upon completion of job

### ISO17025 Certified
NSI complies with general requirements for the regulatory compliance of testing and calibration of pressure and temperature

### TSA Pipeline Security SD-02C
Ensure compliance with role-based access security within RTUs

### UL508A Accredited
Need to put your RTU or Wireless systems in an enclosure? Our UL508 shop can help

### 15+ Years of Experience
Our staff have years of experience with performing field calibrations, commissioning, and on-site troubleshooting
